

Master Identity Management with Windows Server 2024 Certification Guide

The Ultimate Guide to Securing Your Organization's Identity

In today's digital world, identity management is more important than ever before. With the increasing number of cyber threats, businesses need to have a robust identity management system in place to protect their data and resources. Windows Server 2024 is the latest version of Microsoft's server operating system, and it includes a number of new features and enhancements to help businesses improve their identity management.

What's New in Windows Server 2024 Identity Management

Windows Server 2024 includes a number of new features and enhancements to identity management, including:

- **Active Directory Federation Services (AD FS) 4.0:** AD FS 4.0 provides a number of new features and enhancements, including

support for multi-factor authentication, single sign-on, and claims-based authorization.

- **Azure Active Directory Connect:** Azure Active Directory Connect is a new tool that makes it easier to connect your on-premises Active Directory to Azure AD. This allows you to take advantage of the cloud-based features of Azure AD, such as multi-factor authentication and single sign-on.
- **Windows Hello for Business:** Windows Hello for Business is a new feature that allows users to sign in to their Windows devices using their fingerprint, face, or PIN. This provides a more secure and convenient way to sign in to devices.
